LEBLON
EQUITIES

THE FUND

Leblon Equities Partners Fund is an open-ended investment fund incorporated in the Cayman Islands as an exempted company limited by shares. It was incorporated on October 2, 2008.

OBJECTIVE

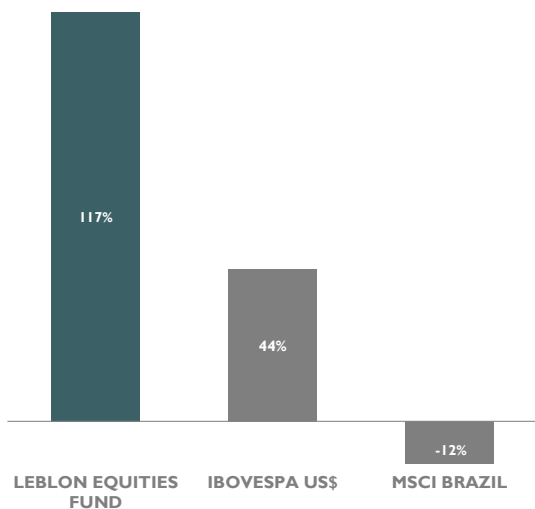

Class Leblon Equities Fund aims to provide investors superior risk-adjusted long-term returns comprised of capital appreciation (capital gains, dividends and interest income) by investing in equity instruments issued by public companies listed on the São Paulo Stock Exchange (B3), which in the Investment Manager's opinion are mispriced relative to their intrinsic value. No designated Investments will be made in respect of the Class Leblon Equities Fund.

STRATEGY

Leblon Equities Partners Fund has a value-oriented strategy based on an extensive fundamental research effort. To determine whether a security is significantly mispriced relative to its intrinsic value, the Fund conducts a bottom-up analysis of the business. The main valuation tool is Discounted Cash Flow in addition to peer group multiples analysis. The typical portfolio would range from 15 to 25 stocks that individually should not exceed 10% of NAV and the top 5 holdings should normally account for 40%-50% of the NAV. Risk Management is based on liquidity and "margin of safety" when defining target prices. According to the liquidity rule, the investment manager must be able to liquidate 30% of the portfolio linearly, assuming a participation of 30% of individual assets' liquidity. It is assumed that the liquidity of each asset is the daily average of the volume traded in the last 3 months.
